

I ♥ ASP.NET

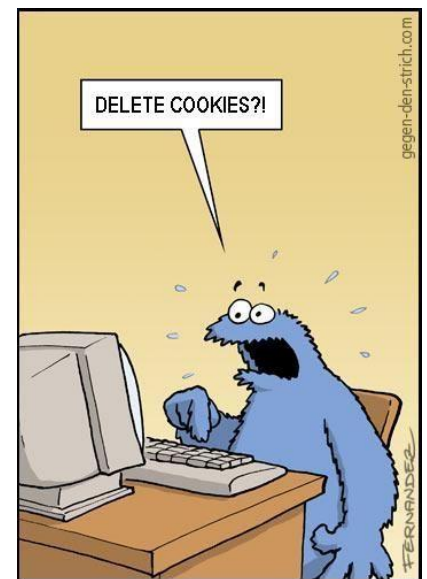

Hello My Team Members!

How was your AMAZING day? We have a wonderful class, and I like it to the moon and back.

Here is the warmup exercise for completing session six.

Tasks and Questions (Estimated time to complete this part is 2 hours)

1. Please create an ASP.NET project to provide a simple ASP.NET webpage that contains the following components and items:
 - a. Using Master Page to have a unique template for all the pages
 - b. Use menu control to help you navigate when you are in different webpages
 - c. Using CSS concept to make a unified appearance
You should make your own CSS file by editing and changing the current samples that you can easily find on Internet.
Please cut the fluff (extra lines of CSS file) and just have those lines that you are going to use.
You can use Marvino's sample as your model.

How to submit:

Please provide me a word document **individually**, and also submit it **individually** on DropBox, including screenshots, your explanation, and your code as appendix. The due date is the next Saturday night February 25th, 11:00 PM. If for any reason, you could not submit the warm up exercise, please email me your final document.

My email address: sdibaj@my.centennialcollege.ca (or smreza.dibaj@gmail.com)

All my best, and wish you the best of luck!

“The time has come to turn your heart into a temple of fire. Your essence is gold hidden in dust. To reveal its splendor you need to burn in the fire of love.”

~Rumi
