Centennial College

CENTENNIAL COLLEGE PROGRESS CAMPUS

COURSE COMP229 Winter 2017
ASSIGNMENT #04

Hello Team Members!

How was your AMAZING day?

As it was mentioned in the session for this week we have two tasks to take care of:

1. Please kindly answer the questions and implement the Midterm project as you are again in the exam session. This time you can use all your available resources, including your friends. The aim of this assignment is to LEARN all we have gone through thoroughly. This time please do not copy, paste…. you saw it does not work. There is a BIG chance to see EXACTLY some of the Midterm questions in your final exam. So let's LEARN them! Just to give you a heads up, the final exam will be in different groups, and more organized. The assignment should be done and submitted **_individually_**.

2. Please provide a **Progress Report** and submit it in its folder on your DropBox. It should contain the following options:
   a. Edited version of your proposal (if needed)
   b. Story board
   c. Paper prototype
   d. Clear scheduling for finishing each step in your project (google it to find how to design a timetable for any project. Using MS Visio is a bonus)
   e. By the end of this week, it is expected to report finishing the design of your Master page, CSS, Skine and your main homepage. If you have any better idea for scheduling, please share. I would love to learn different approaches.
   f. The **Progress Report** should be done within the group, but submitted by the team leader of the group.

IMPORTANT NOTE: If you did not submit your proposal yet, IT IS REALLY A SERIOUS SITUATION that can **_HIGHLY RISK_** your mark. (After all, at least 50% of your mark depends on your term project and it starts from proposal)

1

Assignment Due

The assignment is due on Saturday, March 18th, 2017 at 11:00 PM. Late assignments are only accepted for two additional days and are marked out of 80%.

NOTE:

You should submit the following files in your e-Centennial DropBox:

1- One MS word or PDF document (It should contain your word document that contains all explanations, snapshots from the environment and the results, and your code)
2- A zip file that has all your ASP.NET project files

NOTE:

Please kindly **only if** for any reason you could not submit your code; email your project to the following email address:

sdibaj@my.centennialcollege.ca

All my best, and wish you the best of luck ☺
